SKILLS

- **Technical:** Agile Methodologies, Code Review, Debugging, Java, Python , Software Development, TypeScript
- **Other:** Critical Thinking, Excel, Problem Solving, Project Management, Team Collaboration

CERTIFICATIONS

- Responsive Web Design - FreeCodeCamp.com, 2024
- Digital Literacy - Certiport IC3, 2023

EXPERIENCE

JPMorgan Chase & Co., Wilmington, DE

Jr Software Developer Intern

June 2024 - August 2024

- Developed a buy now pay later feature for over 50 million online credit card customers which contributed to a projected 27% increase in customer engagement and satisfaction.
- Built an API to connect 2 disparate systems to enable new user capabilities.
- Collaborated with cross-functional teams to innovate and deliver solutions.

Jr Software Developer Intern

June 2023 - August 2023

- Leveraged Java and Kubernetes to build a tool to validate the accuracy of batch credit card and retail payments.
- Migrated Python batch scripts to Java to create a consistent code base.

EDUCATION

Code Differently, Software Engineering Bootcamp

Sept 2024 - Dec 2024

- Learning multiple coding languages in a rigorous bootcamp training format (50+ hours/week).
- Developed and maintained high-quality software solutions using Java and TypeScript.
- Participated in code reviews, providing and receiving constructive feedback.
- Documented code and technical processes for streamlined maintenance and knowledge sharing.
- Worked in an agile team environment to ensure project standards for performance and usability.

Delcastle Technical High School — *Diploma*

May 2024

- Cumulative GPA: 3.9
- 1st place SkillsUSA Medal in Computer Science

PROJECTS

- Code Differently Repository — Showcases projects in Java and TypeScript that emphasize problem-solving, algorithm efficiency, and software development best practices.
- Blind 75 Repository — Completed the Blind 75 problem set and enhanced proficiency in data structures and algorithms (e.g., arrays, strings, linked lists, trees, dynamic programming, graph algorithms).
